SKILLS

- Ruby on Rails, Ruby, JavaScript, AJAX, jQuery, HTML5, CSS, Github, Git workflow, RSpec, Jasmine, Sinatra, ActiveRecord, PostgreSQL, SQL

PROJECTS

myTA (Github | Heroku)

- Technologies used: Ruby on Rails 5.0, Javascript, AJAX, jQuery, CSS, Bootstrap, and HTML
- myTA is a Ruby on Rails web application designed to help teachers with basic tasks: randomly choose a student (via cyclic or true randomization), create teams, mark absent, and easily manage your classrooms.

Forked (Github | Heroku | YouTube Demo)

- Technologies used: Ruby on Rails 5.0, Javascript, AJAX, jQuery, Facebook OAuth 2, Spoonacular API, HTML5, and Bootstrap.
- Served as team leader in creation of Forked our final project for Dev Bootcamp. We had one week to create an application and present it to the public. Forked is a social media web app which identifies recipes based upon the ingredients available to the user. You may also search for recipes based on what ingredients you have, cuisine, allergies, dish (main course, side dish), and a specific type of recipe.

Intramuralizer (Github | Heroku)

- Technologies used: Ruby on Rails, Twilio API, Google Maps API, HTML, CSS, and Bootstrap.
- A Rails web application built in two days, which coaches of intramural sports teams can organize their teams and games. When games are created, it will alert both teams the information via text.

EXPERIENCE

Web Developer Apprentice

04/16–08/16

Dev Bootcamp, San Francisco, CA

- An all immersive 19-week program to develop the knowledge of working as a web developer. The main languages learned were Ruby on Rails, Javascript, HTML5, and CSS. We created projects through pair and group programming, practiced good Git workflow, and deployed apps to sites such as Heroku.

Kitchen Manager

05/13–04/16

Little Star Pizza, Albany, CA

- Overseeing and performing all kitchen operations including: managing 15 cooks; labor control on employees; recruiting and training new employees.
- Daily tasks included: scheduling; ensuring kitchen conforms to all health and hygiene standards; food ordering; managing inventory; creating recipes and specials.

Production Assistant (Freelance)

05/11–04/13

Acres, Blue Owl Productions, and Next Level Pictures, NYC, NY

- Worked as a freelance production assistant with Macula Films, Blue Owl Productions and Next Level Pictures.
- Worked closely with producers, directors and production teams to: keep crew on schedule; make deliveries and lunch pick-ups; handle equipment pick-ups and drop-offs; coordinate transportation throughout shoots; transcribe video in post-production; downloaded footage.

EDUCATION

McDaniel College, Westminster, MD

06/08–09/10
